Tetra Society netClé™

Your key to accessible computing

Presented by: Nappy Limapichat,
netClé Project Coordinator

Agenda

What is Tetra Society of North America?

What is netClé?

What does the sign up process look like?

With funding from Canada

Tetra Society of North America

Charitable society dedicated to assisting people with disabilities to achieve independence and fulfilled lives

30 chapters across North America

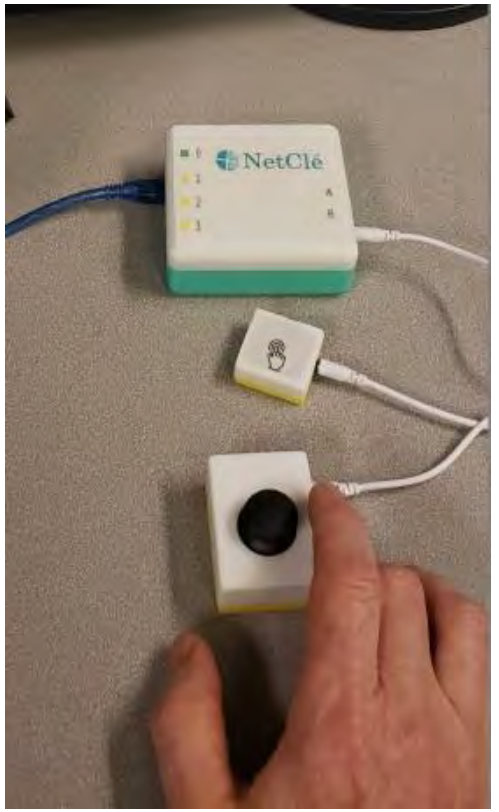
Tetra is powered by skilled volunteers who work one-on-one with people to create customized solutions for each individual and their needs

Solutions created for clients often satisfy a need that could not commercially filled or was cost prohibitive

With funding from Canada

Why was netClé developed?

In 2019, Tetra received funding to build and bring to market an **affordable** and customizable device that provides computer access to users **facing mobility challenges**



netClé (pronounced net-clay)

Meaning: Key to the internet

With funding from Canada

What is netClé?

netClé is a user-friendly, customizable device that enables people with a range of mobility limitations to independently operate a computer

With funding from Canada

How does netClé work?

netClé is a programmable hub with a wide range of customizable peripherals that serve as alternatives to standard inputs like a keyboard and mouse

With funding from Canada

What can netClé do?

netClé can perform a wide range of computer functions:

- Move the mouse cursor
- Left & right click
- Drag & Drop
- Many more!

It can be operated using one or a combination of switches, sensors, joysticks – even a gyroscope!

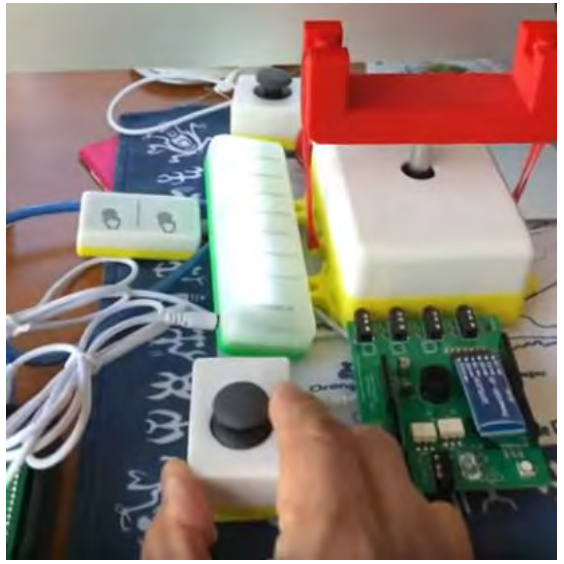
netClé For You

We are in currently in **product testing** phase

Looking for clients to try out netClé and provide feedback

Client will participate in assessment appointment, installation appointment and feedback calls

Client can keep netClé for free as a token of their time



We have given out 100+ netClés already but still seeking more feedback!

With funding from Canada

COVID-19 Response

netClé is installed remotely to ensure compliance with social distancing guidelines

Users interested in remote installation must have a friend, family member or caregiver who can provide assistance (if needed) to unbox and assemble the unit when it is delivered

netClé is currently being distributed for free across Canada to help increase internet accessibility in this time of need
